

GTR801A Introduction to Global Trauma Recovery

Fall

Abstract:

Counselors have nearly instant access to staggering accounts of human suffering around the world. Moved by compassion, many are willing to travel to remote areas in order to provide therapeutic care for those having experienced wars, rapes, abuse, genocide, natural disasters, and many other forms of traumatic experiences. Good intentions notwithstanding, some efforts to heal trauma have harmed more than helped. Utilizing multimedia presentations, guided readings, forum discussions, live case consultation and skill practice, this continuing education course introduces students to trauma in international settings and provides guidance for how Western counselors and caregivers can encourage healing in a culturally sensitive manner.

Objectives:

1. Identify common psychological, spiritual, physiological, and social/relational symptoms of psychosocial trauma on individuals and communities as a result of a variety of traumatic experiences (including combat, domestic and ethnic violence, natural disasters, human trafficking, and sexual violence)
2. Articulate a lived theology of suffering and recovery via Scripture engagement to a traumatized audience
3. Explore the role of culture regarding expressions of emotions, mental health, and religious practices across individualist and collectivist cultures
4. Articulate the general 3 phase recovery process for individuals and communities with special attention to the importance of lament practices
5. Differentiate psychological first aid from recovery and rehabilitation phases of help
6. Define key related concepts: vicarious/secondary trauma, dissociation, memory work, recovery in unsafe environments, and countertransference

**Online Course Dates:**

November through early December, TBD (40 hours of educational activity)

Pre-requisites:

Application required (see www.globaltraumarecovery.org). In addition, all participants must read a minimum of 300 pages of psychological trauma literature. Choices from the following books will satisfy this pre-course requirement.

1. Langberg, Diane (2003). *Counseling Survivors of Sexual Abuse*. Xulon Press.
2. Langberg, Diane (2015). *Suffering and the Heart of God: How Trauma Destroys and Christ Restores*. New Growth Press.
3. Herman, Judith (1997). *Trauma and Recovery*. Basic Books.
4. Krippner, Stanley & McIntyre, Teresa (2003). *The Psychological Impact of War Trauma on Civilians*. Praeger Publishers.
5. Mollica, Richard (2008). *Healing Invisible Wounds*. Vanderbilt University Press.

Note to Students

This is an on-line course spread over 5 weeks. We will provide you with an array of pertinent readings, notes, narrated slides, or other AV materials to highlight key issues. From these materials, you will be expected to react and engage faculty and classmates via discussion boards, reflection papers, and other collaborative activities. Each week we will introduce you to the week's concepts and review our expectations of you. While the course is primarily "asynchronous," you will need to be on the course website on and off throughout each week in order to engage the material and your peers. In addition, there are 4 required live video conferences with the professors. You will notice that we are using our own experiences in Africa to illustrate this course. However, the principles set forth should prepare you to enter into any culture in an effective learner manner.

REQUIRED READINGS:

Burnet, Jennie (2012). *Genocide Lives in Us: Women, Memory, and Silence in Rwanda*. U. Of Wisconsin Press.

Combres, Elisabeth (2011). *Broken Memory: A Novel of Rwanda*. Groundwood Books.

Lieblich, J. & Boskailo, E. (2012). *Wounded I am More Awake: Finding Meaning After Terror*. Vanderbilt University Press.

Lopez Levers, Lisa (2012). *Trauma Counseling: Theories and Interventions*. Springer Publishing.

See weekly schedule for readings. Additional readings found on E-campus.

COURSE PROCEDURES & COURSE REQUIREMENTS

1. **Readings.** Upper-level graduate courses are designed for the motivated student. Required readings are expected to be done by due dates in order to facilitate discussion and interaction with the material. At the end of the course, you will be asked what percentage of the readings you completed on-time. **IMPORTANT NOTE:** Some of the hyperlinked readings listed in the course planner can only be accessed if you are already logged into our E-campus course and using links on those pages to get to the readings.
2. **Discussions.** This course only exists as a reading/on-line course. Each week you will have discussion board entries to make. Each entry should be substantive. You should also plan to respond at least once in each discussion board to another person. Again, these ought also to be substantive. Merely agreeing or disagreeing does not count. [Activity does not count as part of CE hours.]
3. **Live Video Conference Class Time.** Your professor will hold required virtual office hours using Zoom to discuss class materials and reinforce learnings each of the 4 Tuesdays the course is running. United States based students must attend at least 2 of the 4 live interactions and participate in the live discussions. Those who miss any of the webcasts will be required to watch the recording within 72 hours.
4. **Written Assignments.** Postgraduate training focuses less on regurgitation and more on consolidating key concepts (learnings) and application. Each week you will have a short written assignment in the form of a journal to track what you are learning and to consider how you might use what you are learning in your current and future context.
